

Prophetic Proof

A key proof that the Bible is, as it claims to be, the Word of God is its prophetic content. The Scriptures are full of both direct and indirect prophecies that expose its supernatural origins. Possibly included among these are two statements in the book of Revelation (the last book of the Bible) which seem to anticipate live, global coverage of events. For instance, it says about the Lord's return: **"Behold, He is coming with clouds, AND EVERY EYE WILL SEE HIM..." (Rev.1:7).** And then a second statement records the martyrdom of two men in Jerusalem. It says, **"Then those from the peoples, tribes, tongues, and nations will SEE their dead bodies..." (11:9).** It would seem from these verses that global news coverage by the media is anticipated in the Bible since all people see them and not just hear of them.

If so, who could have grasped such a thing back in the first century when the last book of the Bible was written? But today 24-hour news and internet coverage are a part of our daily life. Amazing!

Scientists Who Believe the Bible

Professor Dr.-Ing. Werner Gitt is a retired German scientist who was involved in the research of Cybernetics and Information Technology. He gained his degree in engineering from the *Technical University in Hanover*, and his Ph.D. from the *Technical University of Aachen* where he was also awarded the prestigious 'Borchers Plaque.' As well as publishing numerous research papers, he has written several books and appeared on television. For many years he was *Head of the Department of Information Technology at the German Federal Institute of Physics and Technology*. And what's more, he is a strong Bible-believing Christian!

He believes that, *"the Bible is not only a suitable, but also the ABSOLUTELY ESSENTIAL interpretative framework for understanding the world, and all life in it. No science can work without suitable premises. I now know, too, that our lives will not work apart from the premises in the Bible, given us by our Creator."* So, science doesn't cancel out a belief in God, after all! And this scientist certainly believes that the Bible is *"given us by our Creator"*.
